Office Action Summary

1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

2. Claims 1 and 2 are rejected under 35 U.S.C. § 103(a) as being unpatentable over Dobashi et al. taken in view of newly relied upon EP 0273585. The primary reference is again relied upon substantially as previously set forth, disclosing a paint masking adhesive sheet suitable for covering automobiles, having on one side thereof a rubber based pressure sensitive adhesive which further includes the presence of a broad genus of tackifiers (column 9 lines 35-45). Dobashi et al. fails, however, to disclose a member of applicants' narrowed Markush grouping which can comprise one of two tackifier subgenres, one of which is a "hydrogenated aliphatic/aromatic copolymer petroleum resin". Dobashi et al., however does disclose that "aliphatic, aromatic or allcyclic petroleum resins, . . . and those modified, for example by hydrogenation" are desirable. The secondary reference, however, discloses (note particularly the Abstract, page 2 line 25 - page 3 line 16, particularly page 3 lines 5-10) what appears to be a substantially similar or identical adhesive composition which teaches that "the rubbers are generally tackified with the resin", which resins can include petroleum resins such as those characterized as aliphatic/aromatic, and also desirable are resins made by

copolymerization of pure aromatic monomers . . . with olefins" which the Examiner respectfully submits are inherently hydrogenated, and as such would clearly read upon the second member of applicants' Markush grouping. With respect to motivation for the combination, the Examiner believes that one of ordinary skill, aware of the motivation set forth in EP -585 particularly at page 2 lines 15-18 and the resulting economic and environmental benefits attained therefrom would incorporate the aforementioned tackifier component in place of the closely related subgenus of tackifiers taught in column 9 of Dobashi et al. and thereby either inherently form, or clearly render obvious, the claimed genus of adhesive sheets.

With respect to the Declaration submitted by co-inventor Inoue, it must be noted that this is not given any weight since what was compared was the terpene resin of Dobashi et al., instead of the particular composition the Examiner is now relying upon.

3. Applicants' amendment necessitated the new grounds of rejection. Accordingly, **THIS ACTION IS MADE FINAL**. See M.P.E.P. § 706.07(a). Applicants are reminded of the extension of time policy as set forth in 37 C.F.R. § 1.136(a). The practice of automatically extending the shortened statutory period an additional month upon the filing of a timely first response to a

final rejection has been discontinued by the Office. See 1021 TMOG 35.

A SHORTENED STATUTORY PERIOD FOR RESPONSE TO THIS FINAL ACTION IS SET TO EXPIRE THREE MONTHS FROM THE DATE OF THIS ACTION. IN THE EVENT A FIRST RESPONSE IS FILED WITHIN TWO MONTHS OF THE MAILING DATE OF THIS FINAL ACTION AND THE ADVISORY ACTION IS NOT MAILED UNTIL AFTER THE END OF THE THREE-MONTH SHORTENED STATUTORY PERIOD, THEN THE SHORTENED STATUTORY PERIOD WILL EXPIRE ON THE DATE THE ADVISORY ACTION IS MAILED, AND ANY EXTENSION FEE PURSUANT TO 37 C.F.R. § 1.136(a) WILL BE CALCULATED FROM THE MAILING DATE OF THE ADVISORY ACTION. IN NO EVENT WILL THE STATUTORY PERIOD FOR RESPONSE EXPIRE LATER THAN SIX MONTHS FROM THE DATE OF THIS FINAL ACTION.
